- Highly Trained software and hardware Engineers
- Trains customer by giving complete idea and comprehensive tips

System & Services Product line

■ Broadcast Equipments

System & Services offers a real and functional " Turn-key" solutions in the Radio/TV broadcast sector. More and more this market dictates that companies such as ours, migrate from being simple equipment providers to a more complex and exhaustive station philosophy consultants, offering a vast range of services to include:

- Total project design/management
- Test and acceptance
- Total station warranty
- Systems/equipment procurement/installation
- Technical assistance
- After installation logistical support

The same level of consideration and attention is given to already established networks down to the smallest start-up broadcast stations.

System & Services proposes what we define upgradeable modular global Radio/TV Broadcast solutions, for:

■ CCTV System

Closed-Circuit Television (CCTV) systems help to monitor the area under surveillance easily and more effectively. Since it involves a number of cameras transmitting data to monitors, it makes it fairly easy to keep a constant watch especially for sites with little out-of-hours activity where the value of maintaining a manned presence is limited. Remote monitoring services facility ensures virtual onsite presence and complete off-premises facilities control.

■ Security Equipments

System & Services offers practical business with solution, strategic and tactical security and crucial infrastructure protection against terrorist and security threats in today's most challenging environment. System & Services provides business risk mitigation and strategic security solutions to multinational business, financial institutions, government industries, militaries, NGO's, Multi-National Corporations.
